Respected Dean

Faculty of Pharmacy

Wishing you a good day always,

I want to apply for the teaching opportunity at your university and prefer to reflect on key selection criteria of qualification, knowledge, and skills in my application. In this context, I would like to highlight the following points related to my expertise and research skills.

I did my Ph.D. in Pharmacy Practice in 2011 from Universiti Sains Malaysia. Prior, I did my Bachelors in Pharmacy and Masters (Pharmacology) from the University of Karachi, Pakistan. Since 2007 onwards I am involved in teaching and guiding research students. I worked as research fellow in USM from 2008-2011 where I mentored undergraduate research students in Pharmacoepidemiology, Pharmaceutical Marketing, Evidence-based Medicine, Drug Utilization review, Public health pharmacy, Generic medicine substitution, and Biostatistics. I was actively involved in guiding final year students for their qualitative research work. Just after the thesis submission in February 2011, I joined International Medical University (IMU) as Lecturer, Pharmacy Practice. At IMU I was involved in conducting Professional Skill Development (PSD) and Objective Structured Clinical Examination (OSCE) for three semesters. I was the module coordinator for Clinical Pharmacy and Hospital coordinator in the third year and final year. All these assignments not only helped me to uncover my hidden clinical potentials but also taught me to handle deadlines. In the present institution in IIUM, I am involved in coordination of OSCE for three years followed by the initiation of Home Medication Review Program for final year students. Since last seven years, I am fulfilling the role of Clinical Preceptor in Gastrointestinal, cardiovascular, Renal and Dermatological Clerkships with final year pharmacy program. Besides that I was involved in establishing pharmaco-economic course and contributed as teaching faculty for five years. In my current job, I served as course coordinator for Pharmacoinformatics course and helped the students in the theoretical framework of app development.

The prospective position in your institution seems to be a perfect balance of my experience in training future practitioners for healthcare outcomes, applying my expertise in both qualitative and quantitative methods.

In terms of research skills, I excel extensively in research arena and published in impact factor and peer-reviewed journals of international repute. Besides my peer reviewing responsibilities, I am associated with different international journals in the capacity of Section editor and Associate editor. In the paradigm of book chapter writing I co-authored three book chapters on topics of Social Pharmacy (Elsevier-India), Intellectual property right and access to Medicines (Palgrave MacMillan), and Pharmacy Education and Practice in Pakistan (Elsevier -USA). One of the chapters recently published in Encyclopedia of Clinical Pharmacy and Pharmacy Practice encompass the role of pharmacists in multiple sclerosis.

In the context of research supervision, 12 students completed their undergraduate research projects at IIUM, IMU, and University of Peradeniya, Sri Lanka. Three students completed their PhD projects and two completed masters under my supervision. One PhD student is in process

so far. Apart from grant writing and securing I am tuned to project planning and management of staff and colleagues working as collaborators from other disciplines. I am confident that my expertise in teaching, research and scholarship, my wide-ranging experience in collaborative research and my strong influencing skills make me an appropriate match for this position.

Your Sincerely

Shazia Jamshed
